BEFORE DAAS

HIGH UPFRONT COSTS

High capital outlay leading to less control over budget.

AD-HOC SPEND

Lack of predictability and forecasting around IT budget spend.

ECO CHALLENGES

Device recycling can be costly, complex and pose compliance issues.

LOWER PRODUCTIVITY

Outdated, slower hardware which is less reliable zaps staff productivity.

WEAKER SECURITY

Older built-in security features leave devices at risk.

STRAINED IT DEPT

IT team drained with the complexity of procuring, deploying, supporting, and refreshing devices.

PREDICTABLE SPEND

Regular hardware refresh cycles allow for easier budget forecasting and cost control.

NO UPFRONT COSTS

Flexible monthly billing means no expensive upfront capital spend.

FREE UP IT TIME

Lifecycle and config services save IT time, letting them concentrate on more valuable work.

GREENER IT

Device recycling services ensure that no device will ever go to landfill.
