YOUR GUIDE TO HP TECHNOLOGY FOR AEC

High-end workstation technology for architects,
engineers and construction professionals

Powered by HP & Intel

This guide has been designed to help you choose the right hardware for your business needs. It's based on your role as an AEC professional, the types of activities you carry out, or typical project workflows.

Hardware recommendations have been conveniently categorised as follows:

2D & 3D concepts

Lighter specification prioritising mobile portability for creating everyday 2D and simple 3D concepts.

3D modelling & rendering

Manipulate 3D shapes and render photorealistic models in real time with NVIDIA RTX graphics and multi-core Intel CPUs.

Visualisation

Easily move your projects to a virtual reality environment with VR-ready devices, and then experience them in high fidelity.

Simulation & clash detection

These devices have all the graphics power, storage and memory you need to analyse data in real time and run complex structural simulations.

3D site scanning

Process complex LIDAR point cloud data and create accurate 3D models — packed with massive memory and multi-core Intel processors.

Generative design

Take advantage of today's cutting edge, generative AI-driven tools with hardware designed to power the most demanding GD workflows.

CERTIFIED FOR THE SOFTWARE YOU USE

All of the hardware in this guide has undergone rigorous testing and certification by independent software vendors to ensure you get peak performance from your chosen applications.

DEVICE AS A SERVICE (DaaS) THE SMARTER WAY TO BUY TECH

When your business demands the very best in terms of graphics, storage, memory, and processing speeds, buying tech can be expensive and time consuming.

What if there was a better way... one that saves you up to 25% on TCO compared to traditional purchasing.

With Xeretec DaaS, we can provide the technology you need, ISV-tested and certified to work with the apps you use, on a flexible subscription model. This frees up the capital budget, allowing you to pay for the technology on a monthly basis.

You have the option of bundling in additional services, e.g., configuration, imaging, asset tagging, deployment, maintenance, and support services, cyber security solutions, recycling services, and much more, alleviating the pressure on your IT team.

BUILD YOUR DaaS TECH BUNDLE IN 4 SIMPLE STEPS

1. PICK TECH

From laptops, desktops and screens, to VR and racked solutions.

2. CONFIGURE

Tailor your devices to your exact requirements. Upgrade memory, storage, graphics and more.

3. SELECT SERVICES

Choose from imaging, asset tagging, cyber security and more.

4. CHOOSE DURATION

Flexible payment terms, from 24 to 72 months.

"Xeretec have been really helpful in understanding our IT requirements and help us boost our productivity. The DaaS agreement frees up the capital cost and allows us to invest it elsewhere. We have a fixed monthly payment for the screens and laptops and we know exactly what we are paying for."

- Sukhpreet Bhardwaj, IT Manager, Wallace Whittle
