

A photograph of three people in an office setting. A man and a woman are standing and looking at a smartphone held by the woman. Another woman is sitting at a desk, looking at a computer monitor. The scene is dimly lit with a blue/purple tint.

Microsoft 365 Licensing Health Check

Build a healthier and more cost-efficient M365 environment

Are you making the most of your Microsoft 365 investment?

Many organisations struggle with licensing inefficiencies, security vulnerabilities and unnecessary costs—often without realising it. Our M365 License Health Check is designed to help you take back control of your M365 tenant.

With a centralised view of your Microsoft 365 environment, our free Health Check gives you the clarity you need to reduce costs, optimise licenses, strengthen security, and simplify ongoing management.

Did you know?

95% of organisations are paying too much for their M365 Licensing. Xeretec customers save up to **36%**

Build a Healthier M365 Environment

1

Eliminate Wasted Licenses & Cut Costs

Audit your current license allocation to identify unused or underutilised accounts.

Right-sizing your license usage can unlock significant savings—freeing up budget for other key priorities like cyber security.

2

Monitor Sign-In Activity to Strengthen Security

Proactively track user sign-ins to detect and respond to suspicious activity. Monitoring login patterns helps stop unauthorised access and reduces the risk of data breaches.

3

Gain Visibility into Data Storage & Sharing

Understand how users are storing and sharing data across OneDrive, SharePoint, and Teams. Apply governance to reduce data sprawl and protect sensitive information.

4

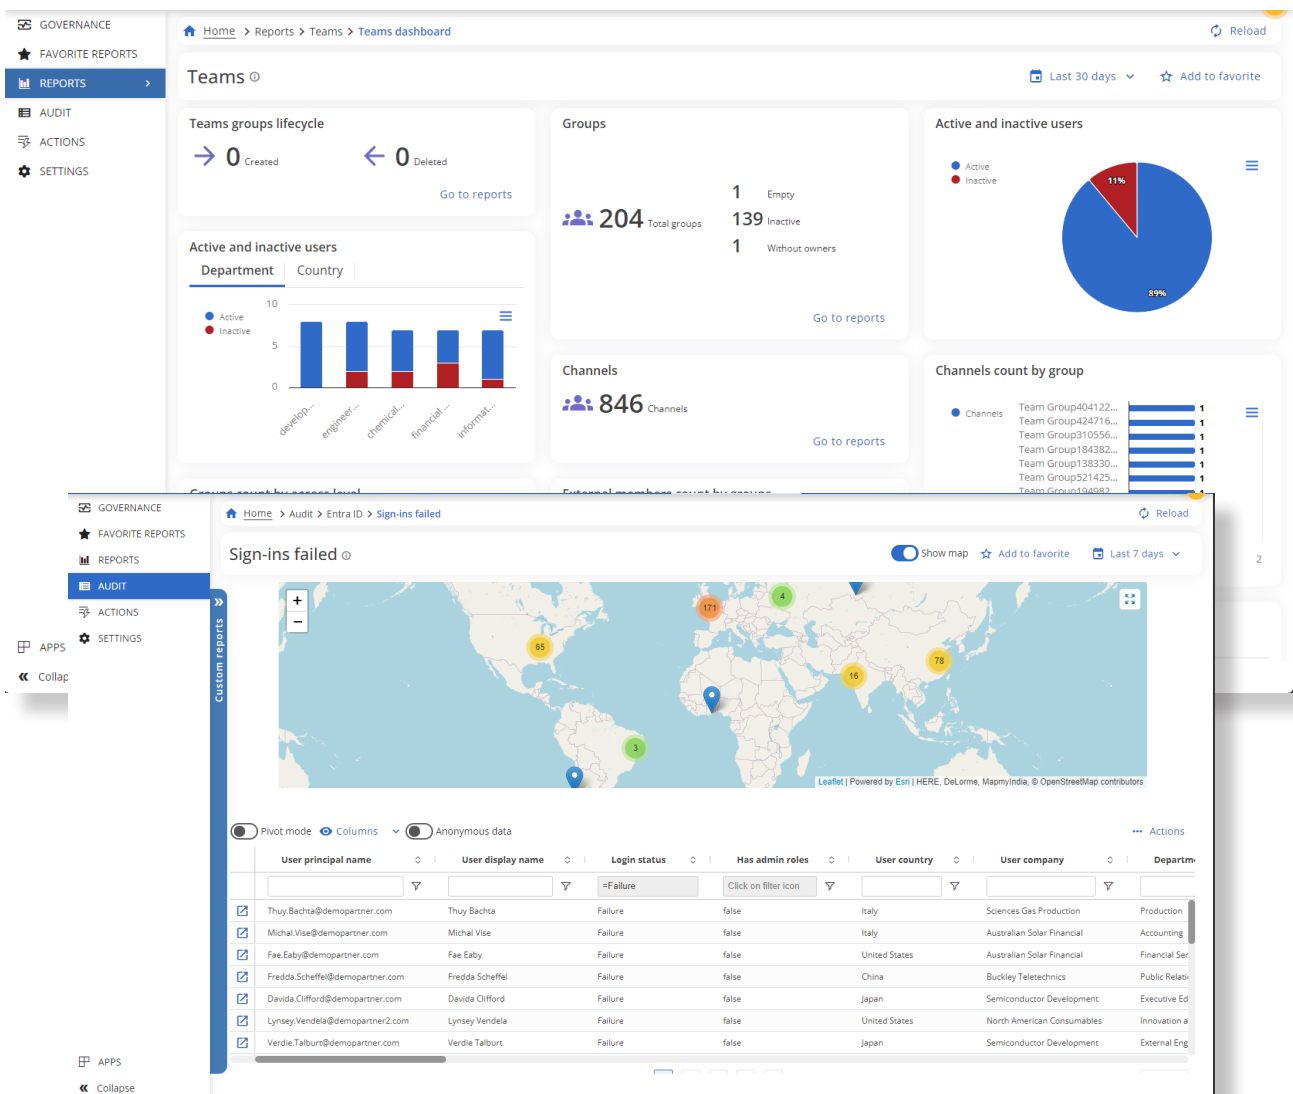

Ensure Security Policies Are Enforced

Misconfigured security settings create risk. Regularly review and enforce MFA, Conditional Access, and compliance policies to ensure your environment stays protected.

5

Streamline Exchange Management

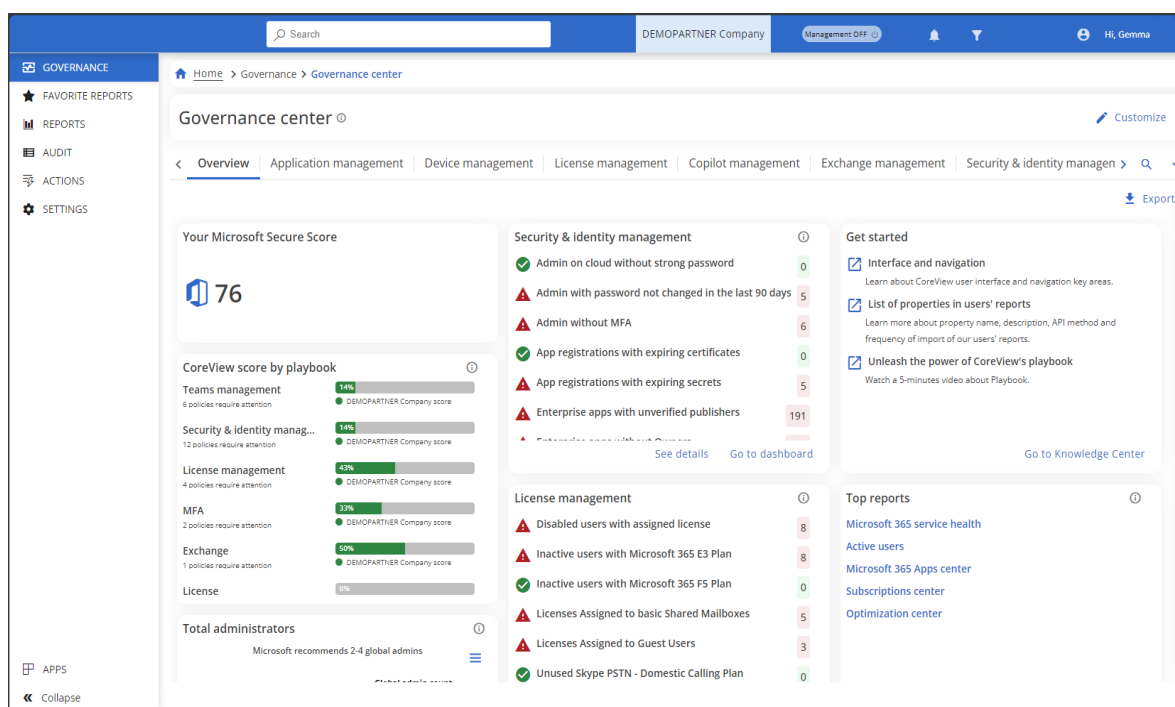

Manage mailboxes, permissions, and configurations with confidence. A well-structured Exchange setup improves both performance and security across your organisation

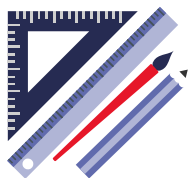

Why a DIY assessment is a challenge - and how we make it simple

Following best practices is essential— but doing it manually is time-consuming

Microsoft 365 admins often need to access up to 21 different portals just to gather the necessary data. Our M365 License Health Check simplifies the process by automatically analysing your environment and surfacing actionable insights—all from a single, easy-to-use dashboard.

From Insight to Action

Instantly right-size or
reassign licenses

Enforce or update
security policies

Manage user access and
permissions all from one
place, without jumping
between Microsoft portals.

Why Choose Our M365 Health Check?

Reduce costs

by identifying and removing unused licenses – **save up to 36% across your tenant**

Boost security

through real-time monitoring and policy enforcement

Stay compliant

with internal and external regulations

Increase efficiency

with clear, actionable recommendations.

Simplify management

of your entire M365 environment

Trusted by organisations across the UK

We've helped businesses of all sizes right-size their Microsoft 365 licenses, unlocking substantial savings with no investment required.

£15,000 per year

Bishal Gurung,
IT Director,
Senapt

"Working with Xeretec was straightforward and efficient. They identified cost savings and optimisation opportunities across my multiple Office 365 tenancies during an initial health check. When my renewal dates approached, they clearly outlined the process for transitioning services to them. All I needed to do was disable auto-renew. They mirrored the necessary licensing and confirmed the quantities in advance, ensuring a seamless transition. The communication throughout the process was spot on."

"We recently moved our Microsoft licences to Xeretec and have seen real, measurable benefits since making the switch. Right off the bat, we achieved a 19% cost saving, but the real value came from the added visibility and control we gained through their services. We were able to run a deep-dive analysis into our M365 environment — identifying misconfigurations, unused licences, and potential security gaps that would have otherwise gone unnoticed. The Health Check gave us a clear, actionable roadmap to tighten compliance, boost security, and optimise licence usage."

Denis Kissane,
Global IT Administrator,
Pulse Learning

Neil Ryalls
Enterprise IT Manager,
Freedom Fibre

"Since partnering with Xeretec, we have benefited from their expertise, dedicated account management and access to the portal which offers all the valuable insights of our MS license volumes, empowering us to make informed decisions regarding our usage. The health check conducted by Xeretec was incredibly enlightening and enabled Freedom Fibre to optimise the value derived from our Microsoft licenses effectively."

Frequently asked questions

Q: Is there a cost to complete the health check?

A: No, we complete the health check free of charge. Following the healthcheck, if you transact your Microsoft licences via Xeretec you also gain access to the platform for the duration of your contract.

Q: What does the health check look at?

A: The three key areas we look at when completing a healthcheck is licence optimisation, implementation of security policies & how to gain centralised management of your Microsoft tenant.

Q: How do I get started?

A: In order to complete a health check all we require is someone with global admin access to authorise an onboarding link. Once activated, we ask for 7 days to allow the data from your Microsoft tenant to filter through. We will then arrange a Teams call to present the findings.

Q: How do you access our data and where is it stored?

A: We will provide you with all the documentation required to ensure you are comfortable with how your data is accessed and stored. The data sat within your 22 Microsoft admin centres is pulled into our platform via a service account on a read only basis.

Why Choose **Xeretec**?

Xeretec combines deep Microsoft expertise with cutting-edge analytics platforms to deliver tangible business outcomes. Our Microsoft licensing experts don't just diagnose problems—they recommend and guide implementation for lasting impact.
